The nominee poses with the women executives for the clean cassava factory. She established the association to enable the women have a structure on which to build their new business.

**Climate aware Teachers Training Program**

Image taken during the first pilot of the nominees Climate Aware teachers training program to train teachers on the basics of climate change.

**Climate Leaders Educational Program**

During the Climate Leaders Educational Program. 135 young people signed up to be trained as climate ambassadors and pledged to join our organization Climate Smart Nigeria to educate the people in their spheres of influence.

Inspired youths at the Climate Leaders Educational Program, a second arm of 'Conserving the environment and Biodiversity' event held on World Environment Day by CSN.

### **Clean Energy Action**

To attain a sustainable environment through transportation, we launched the CEA in partnership with Ketos Energy. Our partner is shown here posing with the hybrid tricycle which will greatly reduce the emission of fossil fuel and improve the economy by helping riders save more money.

A closer look at the hybrid tricycle fully powered by batteries. This is a move to ensure that we play our part to combat Climate Change by promoting and utilizing renewable energy sources of power.

## Others

The National Manager for Power For All; our development partner organization endorses our book

The nominee poses with Kids from one of the partner secondary schools after training them on 'Understanding Climate Change

Students from the nominee's partner school poses with the textbooks.

An on going training session on Climate

change which involved students and teachers from 5 secondary schools

The Green Business

tools. Image shows the Green Biofuel made from saw dust and water hyacinth to replace kerosine and the Clean cook stove manufactured by the nominee's partner organization – Carbon Credit Network. Entrepreneurs are trained on the usage of the items and encouraged to use it themselves in order to market it to others.

The nominee trains students of secondary schools on The concept of climate change using her illustrated book at the Lagos State book festival.

Karen from Geo Sun company, a partner organization endorses and poses with our book after purchasing it.

One of the nominee's team member speaks to a visitor who came by their stand explaining the book to him and the importance of climate change education and encouraging him to purchase it for his kids.

The nominee speaking engagement at the Nigerian Alternative Energy Expo where she spoke on topic – 'Empowering Women and Youth with Renewable Energy'. She spoke about her work and partnerships with Carbon credit network raising Green entrepreneurs promoting green transportation via the partnership with Ketos energy Green tricycle. She also thought the participants who are from development organizations and clean energy companies on how to make briquettes which is a cleaner alternative to firewood which can be used to empower rural women as a rural program or a company CSR initiative.

The nominee and her team members poses for a picture by their stand at the NAEE program. At their stand they received visitors and told them about their work promoting the learning of climate change and the intervention of renewable energy. They educated people on how they can join their organization as volunteer climate ambassadors to help spread the awareness in their areas of influence. They approached companies to support their schools program and sponsor for schools to receive the climate education training for students and get the books for free.

The nominee explains the book and curricular to a prospective donor who later purchased 50 copies to be given free to schools and students for their use.

   @HultprizeAtFUTA

The nominee is recognized for her efforts and is selected as a judge for the Hult Prize challenge. The Hult prize is a program in partnership with United Nations seeking to identify and fund innovative social enterprises that address social problems. Each year University students are challenged to come up with solutions addressing problems in the area of the topic selected for the year.

The nominee participates in the Hult Prize challenge, a program in partnership with the United Nations where she served as a judge and helped select the most innovative business that addresses the problem of energy. Here she posed with the winning team of 2 and her fellow judges; the 2 young men by the extreme left and right.

The Nominee is invited as speaker alongside Nigeria President Buhari at the Nigeria Alternative Energy Expo.
